

Your number one source for

# high quality trash can liners

## STRENGTH YOU CAN COUNT ON!

- Manufactured in both Linear Low and High Density
- Furnished in flat pack and coreless roll configurations
- Available in a wide range of sizes and gauges appropriate for any application

**How do you decide which can liner you need? Our 3-step method makes your selection easy!**

### 1. Determine the proper can liner type.

There are two types of resins commonly used to manufacture can liners: Linear Low and High Density. To decide which one you need, answer this question: "Are sharp objects being thrown away?"

If **yes**, you need Linear Low (gauge/mils).

If **no**, you need High Density (gauge/microns).

### 2. What size container does the liner need to fit?

Ideally, you should have about three to four inches of overhang on the trash receptacles. The following are some guidelines to use when choosing the right size can liner.

A. Use the compatibility chart in the Grainger catalog.

B. The gallon capacity or the size is usually printed on the container.

### 3. How much does the liner need to hold?

Here you'll need to do some calculation. You need to determine the average weight of a full can liner in your environment.

Once you have decided on that number, check the product grid on the reverse side of this sheet under the can liner type and size that you have selected. Go across the grid to the column marked "Max Load". Find the number closest to the average weight figure you calculated and that's the can liner you need.

Exclusively from Grainger®

#### A. Post Consumer Waste Linear Low

#### E. High Visibility Orange - Linear Low

Now on Coreless Rolls

STOCK NUMBER	GALLON CAPACITY	SIZE	GAUGE MILS	MAX LOAD	COLOR	CASE PACK	LINERS/ROLL	ROLLS/CASE
31DK85	40-45	40 x 48	1.50	100	Orange	100	10	10

**A. Post Consumer Waste:** Manufactured with 70% recycled content, 10% post-consumer waste, these premium heavy duty bags are great for industrial and factory use. Strong and durable, they can handle virtually any application. Approved for LEED credit.

**B. Compostable Can Liners:** Grainger compostable liners meet the ASTM D6400 standards for compostable plastics for use in commercial facilities. The use of Grainger compostable can liners helps reduce landfill waste, pollution and conserves water and other resources used in waste site management.

**C. Blue Recycling Liners:** Recycling bags are ideal to hold recyclables included in bag-based municipal curbside recycling programs. They are convenient to use to transport recyclables to community programs, and are strong enough to store a variety of heavy recyclables.

**D. Compactor - Heavy Duty Linear Low:** Designed for use in commercial compactors, these bags are an extra strong 2.5 mils thick.

**E. High Visibility Orange - Linear Low:** The safety orange color makes these bags perfect for roadside applications or any situation where visibility is an issue.

I. Linear Low Drum Liner						Flat Pack
STOCK NUMBER	GALLON CAPACITY	SIZE	GAUGE MILS	MAX LOAD	COLOR	CASE PACK
3CCT8	60	38 x 58	4.00	130	Clear	50

**A. Linear Low Flat Pack:** Same specifications as Linear Low opposite but in a flat pack. Bag features a gusset seal and is available in Clear.

**B. Linear Low - Super Hexene:** Sold by the Roll: Made from prime virgin LLDPE resins, available in individual rolls for added convenience. Available in Clear, White and Black.

**C. Tough Guy - Super Hexene HAO Individually Folded:** Premium can liners are engineered with advanced resins strong enough to handle just about any application. They are ideal for most heavy-duty and industrial applications.

**D. Brute Roll-Out - Linear Low:** These liners are sized specifically to fit the popular Brute Rollout receptacles. Extra tough with a thickness of 2 mils. Available in Clear or Blue.

**E. Pallet Cover/Pallet Box Liner:** These large bags are extremely durable for excellent reusability. They are fabricated to fit specific dimensions, and can be used as liners for large-size pallet boxes (gaylords) and as machine covers. *Pallet Covers can also be utilized to line standard or utility 1/2, 3/4 or 1 cubic yard tilt trucks.*

**F. Draw Tape - Linear Low Drawtape Liners:** Convenient drawstring closure and flat bottom construction allows use of the full capacity of the bag. They are designed to fit the container without waste, adding more capacity. Available in Black and White.

**G. Contractor Clean-Up Bag - Linear Low / Sold by the Roll:** Highly puncture and tear-resistant bags are made from Linear Low Density Polyethylene and are ideal for many contractor, construction and commercial applications.

**H. Contractor Clean-Up Bag - Linear Low with Tie Flaps:** Highly puncture and tear-resistant bags are made from Linear Low Density Polyethylene and are ideal for many contractor, construction and commercial applications. Now with easy tie flaps.

**I. Drum Liner - Linear Low:** 4 mil bags made from Linear Low Density Polyethylene are extra thick for extreme heavy duty applications. Put up in traditional flat pack and sold by the case.

**J. Linear Low Ice Bucket Liner:** Ice bucket liners are provided in a convenient flat pack and fit a standard 3 quart bucket size

**K. Hospital Isolation - Linear Low:** Color coded, bi-lingual printed bags provide efficient management of the disposal of biohazardous hospital waste. Manufactured in high strength, tear resistant Linear Low resins. Infectious Waste (red), Infectious Linen (yellow), Non-Contagious (blue and green).

## The advantages of can liners on coreless rolls

Coreless rolls can help eliminate problems and make your job easier by giving you more convenience, more options, and more control.

The advantages of coreless rolls let you make an even better, smarter choice than before when choosing a liner.

### Easier to Handle

- Rolls eliminate the hassle of slippery, loose liners that can spill or fall on to floor
- Rolls are compact, neat and easy to transport and control
- When a new bag is needed, just pull and tear at the perforation

### Easier to Manage

- Easier to track and count than slippery stacks of flat-pack liners
- Simplifies inventory control
- Helps reduces waste

### Easier to Dispense and Use

- Dispense by hand or with a dispenser
- Rolls can be stowed in the bottom of a waste container
- Makes changing a liner easy and quick
