Introducing the Klein Recessed Can Light Tool Set

(Cat. No. 65020)

This two piece tool set contains the new 6" Cushion-Grip Spring Tool (Cat. No. ST6), perfect for attaching or releasing trim springs. The unique C-shaped tip securely holds the spring, and the long 6" shaft makes attaching it to the fixture fast and easy. No more getting snapped from trying to hook springs with the wrong tool, or losing springs because they unexpectedly flew across the room after slipping off the wrong tool. Now you can install recessed cans faster and smarter than ever before.

Also included in the set is a 1/4" Stubby Cushion-Grip Nut Driver (Cat. No. 610-1/4). The stubby is sized perfectly to reach easily inside the can to loosen or tighten those hidden ceiling height adjustment screws. At just 3-1/2" long, the stubby even fits inside 4" fixtures. The right tools make all the difference.

Also features:

- Cushion-grip handles, the gold standard for professional hand tools.
- Premium chrome plating for a professional feel and exceptional corrosion resistance.
- Patented Tip-Ident® for quick and easy identification.

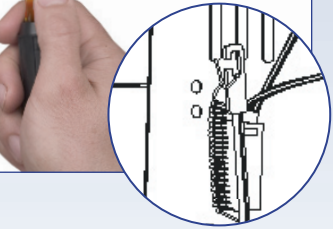

⚠ WARNINGS:

- Always wear approved eye protection.
- NOT insulated. Will NOT protect against electrical shock.
- Do NOT use to pry or chisel.

Perfect for attaching or releasing coil trim springs.

Hooks and manipulates rod springs in spaces too tight for fingers.

Even fits inside smaller cans.
