INDUSTRIAL SCISSORS

INDUSTRIAL SCISSORS

BLUNT NOSE FOR SAFETY

Rounded, blunt nose adds safety. Crafted from **premium, corrosion-resistant stainless-steel**.

CONSISTENT SHARPNESS

The combination of **one smooth and one serrated* blade** results in materials being drawing into the blades for smooth cutting. **Each blade offers consistent sharpness from blade to tip.**
 (*Straight-Edge scissors do not have serrated edge)

LARGE-GRIP HANDLE

Blades **extend into handles** for even pressure distribution and stability. **Industrial-grade stainless-steel rivet** maintains blade positioning from lightweight to heavy-duty materials.
