

BECAUSE YOU TAKE **SAFETY** PERSONALLY

# ABSORBENTS

CATEGORY	RANGE OF PRODUCTS	APPLICATIONS
<p><b>Absorbent Pads &amp; Rolls</b></p>		<p>Absorbent rolls &amp; pads for absorbing universal, chemical or oil spills. Pads are pre-cut, while rolls allow you to choose the length you need.</p> <p>Universal (grey) absorbents are versatile options to contain leaks, drips and spills throughout your facility.</p> <p>Oil-only (white) absorbents are your most cost-effective solution absorbing oils and repelling water.</p> <p>Chemical (yellow) absorbents feature bright hues to aid in disposal and to promote a culture of safety.</p>
<p><b>Spill Kits &amp; Refills</b></p>		<p>Spill kits provide fast response solutions for unplanned spills due to their variety of included products. Spill kits range from 2 gallon absorbency up to 95 gallon absorbency.</p> <p>Keep larger spill kits at all entrances and exits to be prepared for emergency spill clean-up.</p> <p>Keep portable spill kits around the production floor for easy accessibility.</p> <p>Refill kits allow for convenient product restocking after a spill has occurred.</p>
<p><b>Specialty Absorbents</b></p>		<p>Specialty SOCs, pillows and drum covers can be used around a facility when a pad or roll may not be sufficient. These flexible absorbents allow you to place the absorbent exactly where you need it.</p> <p>Use SOCs to mold around leaking equipment that is flush with the floor.</p> <p>Position pillows underneath leaking equipment.</p> <p>Keep drums covered to prevent liquid from reaching the floor.</p>
