IPG®'s SuperFLEX® high performance stretch brand products are light gauge, environmentally friendly stretch films used to effectively replace traditional heavier gauge stretch film. They are available in both machine applied and hand applied and in cast and blown versions. SuperFLEX® products offer the following advantages:

- Best-in-class load holding power
- Resistance to puncture and tear equal to films up to 40% heavier in gauge
- Lighter gauge Genesys® & Genesys® Ultra machine rolls with longer footage rolls reduce the number of roll changes required
- Lighter gauge hand applied films like Orbit™ provide the same performance of heavier gauge products in rolls weighing half the weight
- Available oxo-biodegradable versions which can completely degrade over time but which are also fully recyclable
- Costs to wrap loads will be reduced

GENESYS® & GENESYS® ULTRA HIGH PERFORMANCE MACHINE APPLIED FILM

Longer rolls can reduce roll change frequency by 50%; high stretch capability; works well on high speed stretch wrappers in excess of 50 RPM; excellent film clarity for displaying products or reading bar codes

IPG's StretchFLEX® standard duty stretch brand products have a reputation for reliability and consistency. StretchFLEX® products are also available as machine applied and hand applied, and in cast and blown versions. StretchFLEX® products are the right choice for applications where heavier gauge films make sense. StretchFLEX® products offer the following advantages:

- Best-in-class load holding power
- Excellent resistance to being punctured or torn
- A very wide range of available product sizes
- Machine film available with single-sided cling and two-sided cling

STRETCHFLEX® SSC MACHINE APPLIED FILM

Multilayer cast film; exceptional load retention properties; stretches to 275% stretch level (80 gauge product); exceptional puncture and tear resistance; works well on stretch equipment with speeds to 30 RPM; true one-side cling prevents adjacent loads from sticking together
