

# Sorbent Opportunity Areas – Typical Industrial Plant

# SPC Facility Guide

**Sorbent Center**  
Centrally located, holds back-up supply of pads & rolls.

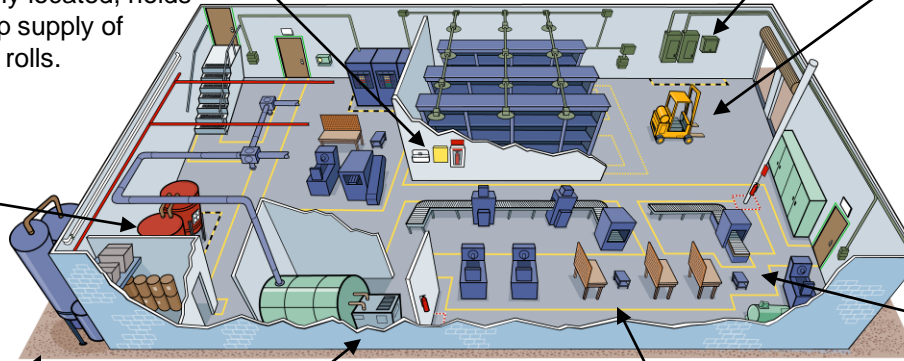

**Spill Kits**  
Emergency response for where spills frequently occur – i.e. receiving dept.

**Industrial Rugs**  
Durable for under fork lifts and other mobile equipment

**Specialty**  
Spill pallets, drum covers, drain plugs, drip pans and pillows manage all types of leaks for specific applications

**Pads**  
Abrasion resistant pads to wipe equipment, tools as well as clean up of small water, chemical and oil based spills

**Oil-Only**  
Ideal for outdoor leaks and spills of petroleum based fluids. Absorbs oil, repels water

**Socs**  
Flexible sorbents in different lengths to surround machine areas and contain routine leaks & drips.

**Rolls**  
2 and 3-ply extra tough material to keep work areas and aisles clean & dry
