

# WOOSTER®

# Roller GAUGE SYSTEM

Excellent with 3/16" Wooster Pro/Doo-Z® FTP™

**Yellow** = Thin film, approximately 4 mils

**Red** = Medium film, approximately 12 mils

**Blue** = Thick film, approximately 22 mils

## Like spiked shoes...put them on and away you go!

Save a step: the innovative Wooster roller gauge system is used to spread, gauge and back roll. These unique polypropylene endcaps control the mil thickness of the coating being applied, replacing the squeegee process. The roller gauges work with roof coatings, floor coatings, epoxies, urethanes, anti-skid floor toppings, vapor barriers, and metallic finishes. Recommended for use with 3/16-inch nap Wooster paint rollers; different nap covers will provide varying results. Each gauge is color-coded for quick selection. The patent-pending product is very simple to use and made in Wooster, Ohio, where we can control the technology.

Description	Cat. No.	UPC 0-71497-	Shelf Pack	Cubic Ft. Per Pack	Pounds Per Pack
Roller Gauge Thin Film (Yellow)	R082	17864-0	6 packs of 6	.081	.48
