

KeepStock MANAGED

Flexible, fee-based solution helps manage all your indirect materials—both Grainger and non-Grainger product.

For many large organizations, managing their maintenance, repair and operations (MRO) materials provides numerous opportunities to reduce expense, increase productivity and mitigate risk. The challenge is identifying and implementing the necessary changes.

KeepStock Managed offers expert onsite support to help you save time and money completing your MRO management tasks. You decide the products to be managed, tasks to be completed and systems to be used. We'll provide a customizable solution that includes a dedicated, experienced Inventory Specialist to complete the necessary tasks, supporting your employees and facility.

Does your storeroom struggle with:

- **Insufficient** staff
- **Inadequate** task execution
- **Inaccurate** inventory data
- **Inefficient** technology
- **Excess** inventory on hand

Create **Accountability**

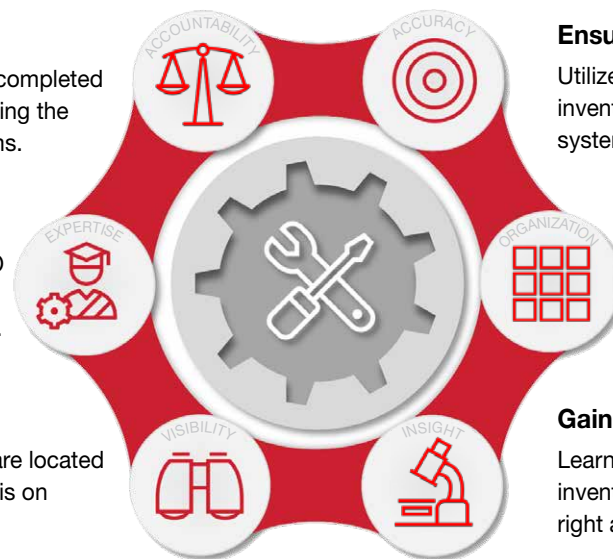

Ensure management tasks are completed with precision and efficiency using the available processes and systems.

Add **Expertise**

Benefit from having Grainger's MRO product knowledge and inventory management skills available on site.

Improve **Visibility**

Know exactly where materials are located as well as how much inventory is on hand—both quantity and value.

Ensure **Accuracy**

Utilize cycle counting and/or physical inventory to verify the values in your system match the values on your shelf.

Maintain **Organization**

Keep items stored and organized in a manner that makes issuance and replenishment fast and easy.

Gain **Insight**

Learn and understand how your MRO inventory behaves over time to keep the right amount of products on hand.

Put Grainger's Expertise to Work for You

More than 50,000 Canadian businesses and institutions across a broad range of industries rely on Grainger for maintenance, repair and operating products and services. We help customers manage over 1,000 facilities with nearly 1.2 million storage locations. Coupled with our supply chain expertise, we can help ensure you have the right parts in the right place right when you need them.

Grainger KeepStock solutions are subject to customer eligibility and agreements.

Product Research
Requisition Management

Order Management

Inventory Maintenance
Inventory Organization
Inventory Replenishment

Product Issuance
Inventory Audits

Material Reporting
Material Analysis

Product Changes
Inventory Optimization
Process Improvement

Assessing Your Facility

Is KeepStock Managed right for you? We'll evaluate the current state of your facility and processes to determine what solutions can provide you the most value.

- > **Tour Facility:** Provide visibility to all MRO-related stocking locations and an overview of how indirect material flows in and out of your facility.
- > **Interview Stakeholders:** Gain clear understanding of current process effectiveness, task execution and material management challenges via stakeholder conversations.
- > **Assess Systems:** Evaluate digital technology, equipment and data collection methods currently in place to assist with MRO material management, reporting and analysis.
- > **Map Processes:** Map existing material management processes, such as product search, inventory issuance, replenishment and non-stock requisition.
- > **Observe Tasks:** Monitor tasks associated with MRO materials to validate information gained from stakeholder discussions and process mapping.
- > **Review Logistics:** Document facility logistics and operational expectations, such as safety requirements, acceptable attire, material handling restrictions and security access.

More Options

Consignment

Keep critical items on site and only be invoiced for them once they're consumed.

eProcurement

Integrate KeepStock with your procurement system to automate processes.

Trailer

Temporary storage for Grainger items when special projects, plant turnarounds or other events create increased demand.
